ABOUT US

Background & Origin

- **Long-term involvement in Bitcoin mining** operations.
- **Lightweight alternative** developed to replace energy-intensive and expensive specialized mining hardware.

Core Platform Functionality

- Users can **earn Bitcoin rewards** without direct hardware ownership.
- Simple **1-click activation**: **“Claim Bitcoin”** connects your mobile device securely to our distributed network.
- Devices contribute available **processing resources** to earn a share of the mined assets.

MISSION & VISION

OUR MISSION

To **lower the entry barriers** of cryptocurrency mining, making digital asset accumulation simple, low-cost, and **accessible to any user** with an internet-connected mobile device.

OUR VISION

Building a globally **distributed processing network** that power decentralized ledger validation, transitioning into a **fully functional DAO** with utility tokens trading on primary platforms.

WHY CHOOSE US?

01

ACCESSIBILITY

Claim **Bitcoin** and other high-value tokens with zero initial equipment costs.

02

SECURITY

Passwordless authentication using secure Web3 wallet signatures or encrypted OTP/Authenticator tokens.

03

VERSATILITY

Supports both **free** high-utility coin claims and structured paid ROI investment mechanisms.

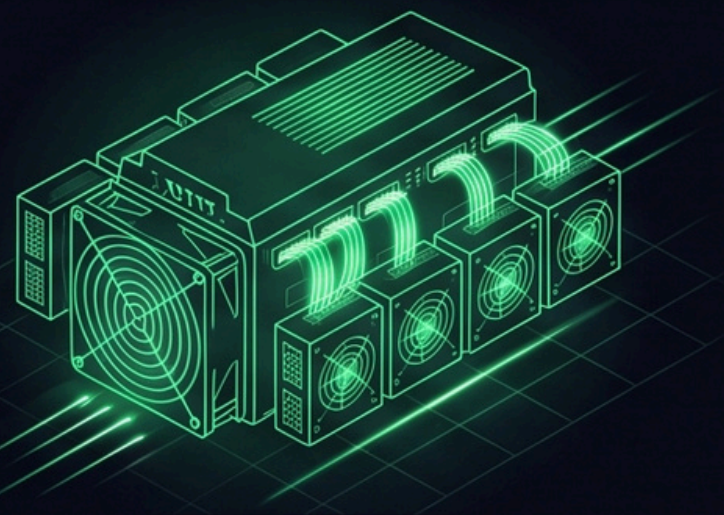

04

SCALABILITY

Uncapped **multi-level network rewards** that incentivize active global community builders.

REVENUE GENERATION ENGINE

How HEXA MINT PRO Generates Sustainable Ecosystem Payouts

REVENUE SOURCE 01

Bitcoin Mining Infrastructure

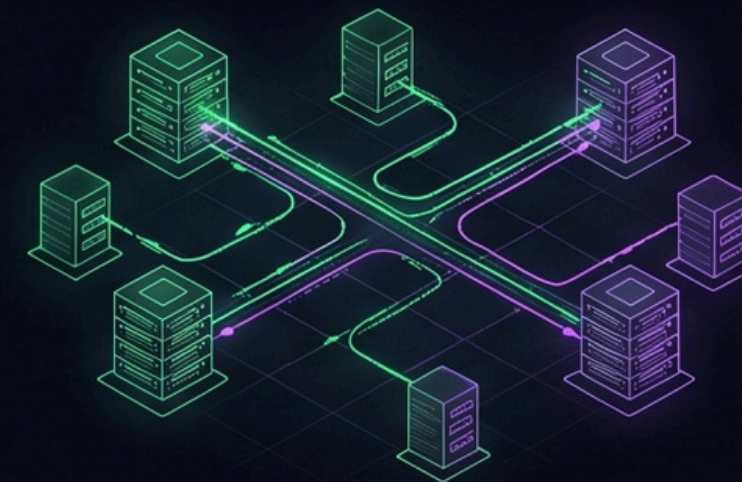

Deploying high-efficiency, decentralized ASIC hashing nodes globally to secure block rewards and accumulate long-term Bitcoin treasury reserves.

REVENUE SOURCE 02

Foreign Exchange (Forex) Trading

Leveraging advanced algorithmic trading strategies across major global fiat currency pairs to extract consistent daily yields from high-volume liquidity markets.

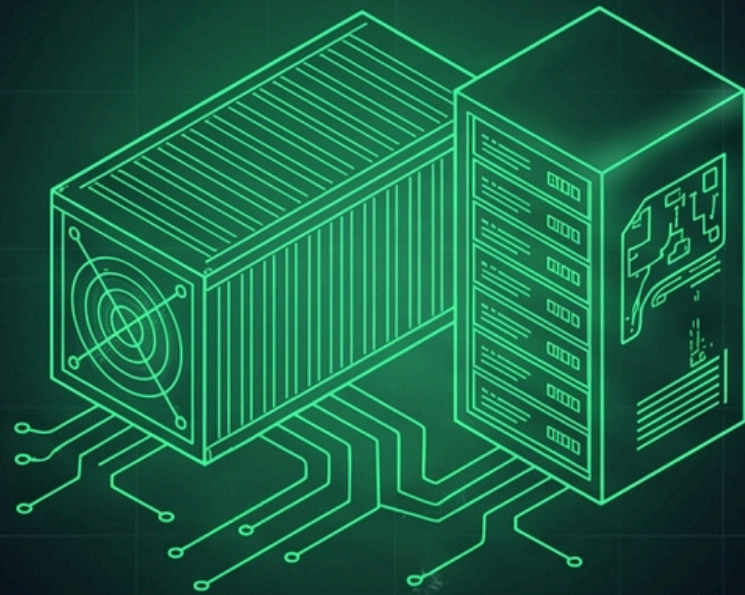

REVENUE SOURCE 03

Multi-Exchange Arbitrage

Utilizing high-speed execution software bots to capture localized price discrepancies of high-liquidity digital tokens across multiple gas instantly.

ACCOUNT CAPPING & SECURITY RULES

Row 01. Daily Limit & 3X Passive Cap

**300% (3X)
1:1 Limit**

Your daily **withdrawal limit** is strictly capped at your **active deposit value** (e.g., \$1,000 active package allows a maximum \$1,000 daily withdrawal).

All combined passive and team earnings are **capped at 300% (3X) of your package**; once reached, payouts temporarily pause until an equivalent re-topup is completed.

02. The Wallet Matching Rule

100% Match

Team performance commissions exceeding your daily withdrawal cap are held as pending dashboard balances. To unlock and release these pending team funds, you must activate a matching deposit equivalent to the locked balance value (e.g., \$1,000 matching deposit unlocks \$1,000 pending wallet balance).

3X VANISH RULE & UNLOCKING PROTOCOL

Row 01 (The 3X Cap & Vanish Mechanics)

Enlarged Explanation Column

**300% (3X)
10-100 Limit**

For an active **\$100** investment, withdrawals are capped at **\$300** maximum (including pending requests; range from **\$10** to **\$100** per request). Once capped, the daily **0.5% Dividend** and all Generation Matching bonuses permanently vanish to the treasury. Withdrawals blocked while capped, but existing balances are **never deleted**.

Row 02 (Payout Timing & Cap Refunding)

Dividends process automatically at **00:00 UTC** daily (approx. 5:30 AM IST). Generation bonuses and manual dated payouts vanish simultaneously during capped state processing. Withdrawals count toward the cap immediately upon submission; if rejected by an admin, the cash amount and the 3X cap usage are fully refunded.

00:00 UTC

Row 03 (Re-Topup Unlocking Protocol)

To unlock your account, you must perform a re-topup equal to or greater than your active investment. For a **\$100** package, a **re-topup of at least \$100** is required (smaller deposits will not unlock it). Future yields **resume instantly** upon top-up, but previously vanished earnings are lost permanently.

100% Top-Up

WITHDRAWAL CAPPING & COIN BURN MECHANICS

BURN / FORFEIT

Active Daily Capping & Burn Penalty

- Your daily withdrawal limit is strictly capped at your active deposit value.
- **The Burn Penalty:** If you withdraw with an active \$100 ID while having \$1,000 in pending team commissions, only \$100 is processed (minus 10% fee = \$90 paid). The remaining \$900 is **permanently burned and forfeited**.
- This capping penalty can occur for a maximum of 3 consecutive days before reaching the 3X ceiling (\$300) and locking the account.

SHIELD ACTIVE

Re-Topup Protection Protocol

- **How to Protect Your Earnings:** Before hitting the withdraw button, you must **upgrade/top-up** your active package to match or exceed your pending daily income.
- **Example:** Upgrade your active ID from \$100 to \$1,000 to instantly raise your daily withdrawal limit to \$1,000. This secures your full \$1,000 payout without any burning, while expanding your absolute earning cap to \$3,000 (3X).
- To maintain active withdrawals, simply top up with an additional \$1,000 once your 3X earnings limit is completed.

TERMS, CONDITIONS & SECURITY

Operational Guidelines:

- Minimum Withdrawal Amount: **\$10**

- Admin Processing Fee: **10% deduction on every withdrawal transaction.**

- **Package Duration:** 365 days.

Anti-Fraud & Security Measures:

- **Single Identity Mapping:** No multiple accounts using identical names, email, or telephone details.

- **Secure Passwordless Web3 Access:** Authentication runs via Web3 wallet signatures or encrypted OTP/Authenticator tokens.
